

RCATS is served by two Transportation Advisory Board Committees, one from Montgomery County and one from Randolph County. The TAB Committees serve in an advisory capacity to the RCATS governing body. It is the task of the TAB committees to represent the voice of the communities and to present any unmet transportation needs or other concerns from each county. The TAB committees meet separately and review current operations with the RCATS management team quarterly as well as a combined meeting annually. The TAB committees are comprised of representatives from the various human service agencies that RCATS serves as well as members from the general public.
